Meteorologist's View

Nothing to add

Forecast for Saturday 18 Dec 2021

Weather: Some lingering mist and fog around foothills. Settled with vast majority staying dry with occasional bright or sunny spells, best of these across eastern ranges of the Park area and during the afternoon.

Maximum wind: Variable, mainly west, 10mph or less

Chance of cloud free mountain/hill tops above 800m: 30% becoming 50% in the east for afternoon

Visibility: Good or very good, but very poor in fog with bases widespread to occasional down to 500m.

Temperature:
Valleys: Plus 1 Celsius early and late, also where mist and fog linger, but in brightness lifting 8 Celsius during the afternoon
At 800m: Plus 3 Celsius lowering Zero later
Freezing level: Generally above the summits, but sub-zero layer developing from mid-levels later as inversion strengthens

Ground Conditions Supplement
Date: Thursday 16 December 2021 Location: Helvellyn summit at 14:30 Full report: The thaw is continuing across the Lake District fells with the majority of popular routes passable without stepping foot on snow with some careful route choice. The remaining patches of snow are to be found in hollows and gullies above 700m and mainly on N through E slopes. These aspects also feature small and unstable cornices which should be given a wide berth especially in poor visibility. The snow pack was generally soft but harder and icier where it has been compressed by walkers feet. The current high pressure weather system is forecast to create some long lasting cloud inversions. It also means the remaining snow pack will likely refreeze overnight. Therefore it's recommended anyone planning on walking on snow or venturing into steeper terrain, especially in the morning, go suitably equipped with an ice axe & crampons. Striding & Swirral Edges can now be traversed without setting foot on snow with good footwork and route choice. However as above they are surrounded by a lot of steep, snow covered and consequential terrain so please make good decisions based on your experience and have the correct equipment with you. Temperature: plus 3.0 C, Maximum wind speed 23.5 mph, Wind chill: minus 4.3 C, Average wind speed: 22.3 mph
